

# Multimix Discharge System

**Multimix Discharge System** is used with the combination of Multimix Planetary Mixer. It is used mainly for very high viscosity up to millions centipoises material which is having no flow and difficult to be discharged by the conventional methods such as pumps.

### Main features

- Eliminate the need for any manual intervention such as scrapping the mixed materials from the mixing vessel. Thus, allows saving times & manpower, prevent cross contamination & decrease the risk of worker injury.
- Solid robust structure & precision designed.
- Hydraulic lifting allows various positions for discharge purpose.
- Less maintenances & easy to be cleaned

	HP5	HP50	HP100	HP200	HP300	HP500	HP1000
Capacity(liters)	5	50	100	200	300	500	1000
Press diameter(mm)	215	475	560	700	780	1000	1200
Max pressure (Mpa)	7	15	15	25	25	25	25
