

Vacuum Ribbon Blender (RB)

Multimix®

Multimix Vacuum Ribbon Blender

The Vacuum Ribbon Blender RB series is specially designed for the transfer of powder to the main mixing chamber as compared to the conventional method of pouring the powder from the top of the cover into the vessel which creates much of contamination due to the dusty environment in such processes. The RB series eliminates the dust problem during the mixing process.

The Main Advantages are:

- Elimination of dusty environment
- Prevention of oxidation
- Maintaining of the stability of the product
- Homogeneous mixture of powders

Specifications

Model	Working Cap liters	Power hp	Speed rpm	Through size/mm		
				Width	Length	Depth
RB20	20	1	50	230	410	280
RB200	200	3	50	430	970	530
RB400	400	5	45	540	1220	640
RB1200	1200	10	35	760	1980	870
RB2100	2100	15	30	910	2440	1010
RB3200	3200	20	25	1020	3050	1120
RB4000	4000	25	25	1110	3050	1220
RB6000	6000	40	20	1380	3050	1480
RB10000	10000	50	15	1680	3660	1830

Optional Attachments

- Paddle Mixer
- Ribbon & Paddle Mixer
- Powder Transferring System
- Weighting System
- PLC Control System
- Vertical Mixer
- Non-Gravity Mixer
